Internship Presentation
2026

Web Developer Internship

Codec Technologies Pvt. Ltd.
02 July 2026 – 02 August 2026

A one-month, project-oriented internship focused on practical web-development exposure, task execution, testing, debugging, and professional work practices.

Web Developer Intern • Hybrid

Candidate Profile

Academic and internship details

**Ayush
Pal**

B.Tech – Computer Science
& Engineering

**IILM University
Greater Noida**

Institute

IILM University, Greater Noida, Uttar Pradesh

Programme

B.Tech (Computer Science and Engineering)

Internship Role

Web Developer Intern

Organization

Codec Technologies Pvt. Ltd.

Duration

1 Month • 02/07/2026 – 02/08/2026

Mode

Pan India • Hybrid

Codec Technologies Pvt. Ltd.

Organization and internship context

Codec Technologies is described in the internship offer letter as a global platform dedicated to empowering learners and connecting diverse talent with meaningful career opportunities.

The document states that the organization delivers dedicated IT and business consultancy services across 27+ countries, with a focus on global innovation and strategic growth.

Location reference in offer letter: Chandivali IT Hub, Mumbai

Global Reach

IT and business consultancy services across 27+ countries.

Learning & Careers

Focus on empowering learners and connecting diverse talent.

Internship Environment

Project-oriented training with assigned project head(s).

From Academic Learning to Practical Web Development

What the internship was intended to provide

The one-month internship provided practical exposure to the role of a Web Developer Intern. The offer letter describes the programme as an immersive experience designed to build industry-level knowledge and valuable skills.

1

Practical Exposure

Connect classroom concepts with real task-oriented development work.

2

Assigned Tasks

Complete projects and training activities through the prescribed platform and email.

3

Professional Workflow

Understand planning, implementation, testing, review, and improvement.

4

Growth

Strengthen programming, debugging, communication, and time-management skills.

Official designation: Web Developer Intern | Reporting: Assigned Project Head(s)

What the Internship Set Out to Achieve

Core learning and professional goals

Practical Web Development

Gain exposure to the workflow of building and refining web-oriented solutions.

Problem Solving

Strengthen logical thinking by breaking tasks into manageable development steps.

Testing & Debugging

Learn to identify issues, test functionality, and improve solutions systematically.

Professional Discipline

Develop consistency in communication, time management, documentation, and delivery.

Academic Application

Connect B.Tech CSE concepts with practical development activities.

Career Readiness

Build confidence for future projects, internships, and software-development roles.

Development Areas Covered

The supplied documents identify the role, but do not specify a fixed technology stack

To keep the presentation faithful to the offer letter and certificate, the following are presented as development concepts relevant to the internship role rather than unsupported claims about a specific framework or language.

Web Development

Understanding the structure and workflow of web-oriented solutions.

Programming

Applying programming logic to assigned development tasks.

User Interface

Considering clear, usable, and organized interfaces.

Testing

Checking functionality and behavior against requirements.

Debugging

Finding issues and correcting them systematically.

Communication

Following project instructions and communicating through prescribed channels.

From Requirement to Submission

A practical, iterative approach for assigned web-development work

Requirement → Planning → Development → Testing → Review → Improvement → Submission

The One-Month Work Process

Learning, implementation, checking, feedback, and completion

01 Orientation

Understand the internship role, expectations, communication process, and assigned work.

02 Learning

Review concepts and instructions needed for assigned development activities.

03 Implementation

Complete project/training tasks using programming and web-development concepts.

04 Testing & Debugging

Check results, identify issues, and improve the implementation.

05 Review

Evaluate completed work against task requirements and guidance.

06 Submission

Complete and communicate assigned work through specified internship channels.

Skills & Capabilities Gained

Technical, problem-solving, and professional development

- Improved understanding of practical web-development workflows.
- Better ability to break a development problem into smaller tasks.
- Greater confidence in programming logic, implementation, testing, and debugging.
- Improved awareness of usability, structure, maintainability, and quality.
- Experience in working with assigned tasks and project-oriented instructions.
- Improved professional communication, time management, and responsibility toward deliverables.
- A stronger connection between academic CSE concepts and practical development work.

KEY TAKEAWAY

**The internship helped
bridge the gap between
theoretical learning
and practical
development.**

Structured work • Continuous improvement •
Professional discipline

Successfully Completed

Internship completion certificate confirms Ayush Pal completed the one-month internship as Web Developer Intern.

ORGANIZATION **Codec Technologies Pvt. Ltd.**

ROLE **Web Developer Intern**

DURATION **02/07/2026 – 02/08/2026**

PROGRAMME **1 Month AICTE & ICAC Approved Internship**

Official offer letter and completion certificate attached as supporting documents.
